

Design Recommendations & Process Support

S&N Airoflo is fortunate to have the University of Memphis Tennessee's Dr. Larry Moore on staff.

Below are some of Dr. Moore's accreditations and recent accomplishments:

Dr. Larry Moore
Ph.D., P.E., D.E.E.

Dr. Moore recently conducted a two-day workshop for the U.S. Environmental Protection Agency (EPA) Region 4 / Southeast United States in Atlanta. The workshop focused on energy conservation at water and wastewater treatment plants.

The two-day training was simulcast over the EPA Website to anyone around the country interested in saving energy at WTPs and WWTPs. More than 100 sites from California to New England participated in the training. This training was funded by EPA through a formal contract with the University of Memphis.

At EPA's request, Dr. Moore will soon be conducting studies at six WWTPs in the state of Alabama, with the goal of achieving significant energy savings and optimizing performance of the WWTPs..
